The curious Cube Houses, Rotterdam, the Netherlands

These strange houses were designed in the 1970s. They are made in cube shapes turned on their points. This gives space for people to walk underneath. From a distance they look like a forest and the people who live in them feel like they are living in a tree village.

Would you like to live in a house like this?

The different faces of Jennifer Lawrence

Jennifer Lawrence is twenty-six. She's from Kentucky, USA. She's friendly and funny. She's slim, tall (1.75 m) and pretty. Her eyes are blue and her hair is blonde. But Jennifer is an actor and actors can change their appearance.

In *Winter's Bone* Jennifer is Ree, a quiet seventeen-year-old girl from a poor family. She's unhappy. Her hair is long and dirty.

In *American Hustle* she's Rosalyn, a nervous woman with beautiful blonde hair and perfect make-up.

In *The Hunger Games* Jennifer is Katniss, a teenage girl with long dark hair and grey eyes. She's brave and strong and she can shoot arrows.

In *X-Men* Jennifer is the mutant Raven. Raven's clever, she can speak fourteen languages, but she isn't very nice. She's very different from Jennifer. She's over 100 years old. Her hair is red, her eyes are yellow and her skin is blue! But Raven and Jennifer are not completely different: Raven can change her appearance too.

Max: Hi and welcome to *To The Max*. I'm Max Gregg and I'm thirteen. My family and I are from Boston in the United States, but at the moment our hometown is Rye in England.

I'm a dance fanatic. I've got my own dance studio in our garage at home. I've also got a video blog about dance. It's got some great tips about how to do different kinds of modern dance. My video blog hasn't got any fans at the moment. It's a shame!

I've got a big sister, Lily. She's nineteen and she's at university. Has she got any hobbies? Well, her hobby is learning languages. She can speak four languages: English, German, Polish and Russian. She's really smart!

Rye has got a castle and lots of old houses, but it hasn't got much for teenagers. Our house is twenty minutes from the sea, but I can't swim!

I haven't got a big family. Just me, Lily and Dad. We haven't got any pets. Dad's got a job at a university near here. He's OK, but he's got a really uncool car and he can't drive very well, especially in London. Oh, and he can't cook.

Hi there! It's a shame.

In the UK there's a memory competition for children. It's the National Junior Memory Championship. The children's schools are a bit different. They have reading lessons and writing lessons, but there are also memory lessons!

This year the competition is at London Zoo. The children have different tests. They've got a list of numbers. They've got a list of words. They've got a list of names and they've got information about London Zoo. And they've only got five minutes.

Joachim can remember forty-seven words – that's fantastic! Iris can remember forty names – that's fantastic too. But the winner is Lily-Rose. She can remember thirty numbers, thirty-five names and ninety percent of the information. Wow!

Look at the numbers above for 30 seconds. Then close the book and write down as many as you can.

OLLIE

the teenage chef

There are lots of great recipes with eggs. You can **beat** them with salt and pepper and make scrambled eggs. You can **fry** them in oil and have them for breakfast with bacon – it's not good for you, but it's delicious! You can **boil** an egg in water and eat it with toast. It's great and a boiled egg only has seventy-two calories! There's a fantastic Italian pasta meal with eggs: spaghetti carbonara. It's 'delizioso'! There are delicious egg desserts too: you can **bake** a cake or make a chocolate mousse.

I'm from London but my favourite egg recipe isn't English; it's Spanish omelette. It's very easy. The ingredients are potatoes (500 grams), one large onion, six eggs, oil, salt and pepper. **Cut up** the potatoes and onion and fry them in oil. Then beat the eggs in a bowl with a fork. **Add** the potatoes, onion, salt and pepper. Cook it in a frying pan with some oil. Then use a plate to turn the omelette over and cook the other side. Olé!

Unusual restaurants in the UK

There are lots of cafés and fast food restaurants in the UK. We can eat cheap food there. But sometimes it's fun to eat in unusual places. Here are some very unusual restaurants in the UK.

1 The Bel Canto

Do you like music with your meal? Then the Bel Canto in London is the restaurant for you. The name is Italian, but the food here is French. What makes the Bel Canto special? Its food and its opera-singing waiters! At the Bel Canto, you can enjoy a delicious French meal while your waiter is singing opera for you.

2 The Tea Cosy

In Brighton there's a very special restaurant. It's called the Tea Cosy and it's a Tea Room. You can have a traditional English afternoon tea here with tea, some cakes and small sandwiches. It's an amazing place. There are a lot of pictures and memorabilia of the English Royal Family here.

3 Dans Le Noir ?

The name of this unusual London restaurant is French for 'In the Dark?'. Here you can't see any food on the table - there aren't any lights! There aren't any menus to read and all the waiters are blind. Choose from fish, meat or vegetarian and your dinner is a surprise! You can't see your meal but you can smell and taste it, and guess the ingredients! It's delicious.

But they don't say anything about George's bad habits! George sleeps all day – he doesn't do anything! When my parents come home in the evening, George wakes up, washes and gets something to eat. After that he goes out and doesn't come back all night!

Astronauts have very small cabins and they sleep in sleeping bags. Many astronauts have problems sleeping. It's noisy and it's hard to stop moving. 2 _____
Astronauts work about eleven hours a day. They do experiments, write reports and talk to scientists on Earth. Sometimes they do spacewalks to check the space station. They also exercise about two hours a day. At weekends astronauts clean the station.

3 _____
There is also time to relax. There are often astronauts from different countries on the station and the atmosphere is great. 3.7 WRITING Describing daily routine

I can write about a daily routine.

Post by Erik, 19 November at 20.13

Hi, my name's Erik, I'm thirteen and I come from Tromsø in Norway. It's quite big (70,000 people) but it isn't a typical European city. We're 350 km north of the Arctic Circle, so from November to February it's dark, day and night. It's often very cold, even minus forty degrees. But we love winter – the sky is often a beautiful colour and we love skiing.

Post by Erik, 23 November at 21.12

My day

I wake up at seven o'clock, have a shower and then have breakfast: bread, cheese and yoghurt. After that I go to school. School starts at eight thirty every day. We have lunch at eleven o'clock and at two o'clock we go home. After school I do my homework – I'm in Grade 7, so there's a lot of homework now! My parents come home at four o'clock and then we have dinner – meat or fish and potatoes. After that I often meet my friends and we play computer games. In winter I usually stay at home because it's cold and dark. We read or we chat by the fire. I go to bed at ten o'clock.

1 Read Erik's first post quickly. In pairs, answer the questions.

- 1 Which country is Erik from?
- 2 In your opinion, is Tromsø a fun city to live in?

2 Read Erik's second post. In pairs, say what things are different in your lives.

Do child actors go to school every day?

Child actors in London's West End

A lot of young people do the same things every day. They get up in the morning, go to school, play with friends, do homework and go to bed. But some children have a very different day.

Ezra Maye is eleven and he's a young actor. He acts in a show called *The Lion King*. He lives in London with his parents, but his day is often different from his friends. Every second Wednesday he finishes school at 12.00. His mum, dad or grandmother take him to the theatre. In the afternoon he acts in the *matinée*. He also acts in the show in the evening – two times every week. On those days he is at school all day. Then he eats dinner at a restaurant near the theatre. His favourite meal is burger and chips! After that he acts in the show. He's tired after school, but excited about the show. Sometimes he doesn't go to bed before midnight.

Some child actors don't live in London, but they are in shows there. They stay in London for the shows and then they go home for a few days. Then they come back to London again! They study with a special teacher in London. It's difficult and the children miss their friends and family at home. But they all think that they are very lucky because they love acting.

Can students learn without a timetable or classrooms?

Unusual schools

Every school has a timetable so students know what they are doing. Every school has classrooms so students know where to go. Every school gives the students homework and tests. Every school makes rules for its students. True or false? False! Some schools are very different.

1 Waldorf schools

There are primary and secondary Waldorf schools all over the world. These schools can decide about some of the things they teach, but they all teach art, social skills and critical thinking. Students do all sorts of creative play and practical activities, for example, painting, weaving and woodwork. Waldorf schools even have a special subject, Eurythmy. It is a very interesting drama and dance class. There are no tests in primary school, and secondary students take exams only if it is important for university. And there are no grades before students are fourteen or fifteen!

2 Vittra Telefonplan School, Stockholm

The Vittra Telefonplan School in Sweden wants children to learn languages, to learn to work together and to be creative. So in this school there are classrooms and spaces for different group, project and individual activities. The rooms are amazing, colourful places with wonderful furniture. And every student has a tablet or computer! Learning is fun here!

GLOSSARY

Reviews of

Emma Brown, The Musical

Regal Theatre, London

- You probably know the story because it's a film. Emma is a girl from London. Her parents want her to be a doctor, but she wants to be a dancer. The film's OK, but the musical is better. It's wonderful! It's three hours long, but it never feels boring. The actors are brilliant and the dance routines are fantastic! The music's cool too – the songs are old but they're great. And it's funny! I recommend it 100 percent. In fact, I want to see it again!
James, Durham
- I'm a big fan of musicals and I love dance shows, but this show really isn't much fun. The actors are talented and the dance routines are alright, but the story isn't very interesting and the music is terrible. The songs are really old – they're from the 1980s! The show is three hours long, but it seems longer. It's a bit boring, to be honest. *The Music In You* is better!
Jo, Watford

DICTATION

Why do we play musical instruments?

Why learn an instrument?

Many children learn to play an instrument when they are young. In the UK today, seventy-six percent of children aged five to fourteen play an instrument. That's a lot more than in 1999, when it was only forty-one percent. Today, for the first time, the electric guitar is more popular than the violin! The most popular instrument to learn is the keyboards. And playing a musical instrument is good for us. Why?

- A** Scientists think that people who play an instrument can get cleverer. It changes their brains. They have better memories and get better marks in intelligence tests. They're good at Maths and Science too!
- B** Playing an instrument also helps with physical things. Your hearing gets better and you can do sports like running and swimming better too. That's because when we learn to play an instrument, we use different parts of our brains.
- C** It's good for relaxing. When we play an instrument, we can put our feelings into the music. If we're worried, music helps us. We also become more creative.
- D** We can play with other people. It's good for meeting new friends. It's also good to learn how to work together in a team. That's important for our future job.
- E** It's fun! It's exciting and it's rewarding. People listen to music and they're happy. It's a great feeling to make people happy with music.

So why are you waiting? Learn to play an instrument and change your life!

DICTATION

When did football begin?

The UK's national sport

- 1 How many people in the world play football? Over 270 million. And there are about 3.5 billion fans! That's a lot of people! In the UK there are about 8 million players and it's the national sport. Every Saturday people play in matches or support their teams. But where did football start and when? Where was the first game?
- 2 Some people think it started in China two or three thousand years ago. Others think it was in Greece, Italy or Japan. But it probably started in England, many hundreds of years ago. In 1170 some young men went to a field 'for a game of ball'. They made a ball from an animal bladder with air inside! The game got more and more popular. The King was worried because too many people played football and stopped doing archery. And at that time archery was important for wars! There was a football ban!
- 3 But football continued. At first, football was a game for working people. It was fun, but there weren't many rules. Players had lots of fights. Sometimes there were 1,000 players on the pitch! In the eighteenth century boys at expensive schools (public schools) started to play football too. In 1848 there was a meeting to make better rules for the game. We still use a lot of those rules today.
- 4 The British took modern football to other countries. The first game outside Europe was in Argentina in 1867. Some Englishmen worked there and took the game with them. Now it's in every country, in every town and nearly every street!

The Birmingham Mail

Last month Birmingham schoolgirl Becky Carter and her family took part in The Big Switch Off, an experiment to live without electricity for a month. Becky talked to us about the experiment.

Q: Was it difficult to live without electricity?

A: No, not really – it was fun! Sometimes we all played cards. My sister and I gave little concerts – we played guitars. Often we just sat with candles and read or talked. We also went to the cinema a lot! But it was a bit hard without the internet at home. At the beginning I used my phone but then the battery died and I couldn't use my charger!

Q: What were the best things?

A: It was cool to eat together at the table every day. Before The Big Switch Off we always had dinner in front of the TV.

Q: What were the lessons you learned from the experiment?

A: First, it's great we have a gas cooker! Most important, I learned that electricity is awesome! Man lived for hundreds of thousands of years without electricity – we're lucky to have it.

5 In pairs, talk about the last time you/your family were without electricity. How was it?

Dad: You're not listening to me – you're checking your phones! People don't talk or listen any more – they just check their phones.

Eva: That's not fair! We are listening. You can have a conversation and check your phone at the same time.

Dad: Sorry, but I disagree. It's rude. Smartphones are terrible. They're bad for your eyes and the microwaves can't be good for your brain.

Max: Maybe you're right, but smartphones are really useful for checking information. Train times, for example. Remember when you could only get information at the station? It was a pain in the neck!

Eva: I agree. Smartphones are great. And a phone is more than a phone. It's an alarm clock, an MP3 player, an address book, a camera ...

Dad: That's true, but I still think smartphones are dangerous. People don't look where they're going because they look at their smartphones all the time. Max! You're looking at your phone again!

Guess what! I asked Grandma about Dad's job at the gas station. She said that he lost his job after only three days because he was late for work every morning! 😊

Phone me!

Lots of love,

DICTATION

7  3.09 Listen. Then listen again and write down what you hear.

Are museums boring?

Are museums boring? I don't think so!

Museums are often very boring places to visit, but a few years ago some big museums started to get more visitors, especially young people. Why? There was a series of three very funny Hollywood films called *Night at the Museum*. In the films, the exhibits at the museums come alive at night! People started to get more interested in history. They wanted to visit the museums from the films.

1 American Museum of Natural History, New York

This is where they made the first film. The year after the film, twenty percent more people visited the museum. There were more than five million visitors. They wanted to see exhibits like the statue of Theodore Roosevelt, the US president from the film. The museum first opened in 1869. Roosevelt's father started it. It's a wonderful place. They've got the skeleton of a very old woman – she's over three million years old! And there are very big African elephants, lots of dinosaurs and a blue whale that is more than twenty-eight metres long!

2 British Museum, London

They filmed the third film in London. This museum opened in 1759. It was the first free museum in the UK and it's still free today. It's got more than seven million things to see. There are sculptures from Egypt and Italy, like in the film, and the oldest exhibit is nearly two million years old. It's a stone – one of the first human tools. More than six million people visit this museum every year. Because of the film, they are hoping to get more and more visitors.

Maybe the exhibits don't come alive, but they're certainly not boring!

GRAMMAR

Modal verbs: *have to/don't have to, mustn't* | Articles: first and second mention

What's special about ...?

Young people around the world tell us what's special about their countries.

Jessica, 21 years old

#1 New Zealand

'New Zealand isn't the most important country in the world but it's one of the most beautiful. It's a land of islands and mountains, lakes and rivers. The highest mountains are on the South Island. That's where they filmed *Lord of the Rings*. Aoraki/Mount Cook is 3,724 metres high! Most people live on the North Island, especially in Auckland, the biggest city. The longest river, the Waikato, is on the North Island too. It's 425 kilometres long.

What's special about New Zealand? Well, it's very far away from other countries. It's in the South Pacific Ocean, about 10,000 kilometres west of South America. And it's 1,500 kilometres east of Australia across the Tasman Sea.

Another special thing is that there are only 4.6 million people but there are about 30 million sheep!

For example, in China you have to take a present with two hands, but in the USA you don't have to use two hands to accept a present – one is fine. In Spain, in the summer, you *mustn't* be noisy after lunch. You don't have to sleep a siesta, but you have to be quiet. And in Britain you have to wait in a queue for everything and you *mustn't* jump the queue.

B In Japan you ¹*have to / mustn't* take off your shoes when you visit someone's home. But in France you ²*have to / don't have to* take off your shoes – you can keep them on. Austrians are very punctual, so you ³*don't have to / mustn't* be late for a meeting in Vienna. I can find specific detail in an article and talk about learning languages.

What do you know about Esperanto?

In 1873 a fourteen-year-old schoolboy in Warsaw began to invent a language. Ludwik Zamenhof was born in Bialystok, Poland. He was bilingual: his native languages were Russian and Yiddish. He spoke French and Hebrew fluently too. He had to learn two other foreign languages, Polish and German, to understand the different ethnic groups in his home town.

Esperanto: Mondo sen milito*

Ludwik believed that there were conflicts in the world because people spoke different languages. He wanted a world without war. So he decided to invent a universal language. In 1887 he published the book *Unua Libro* under the pseudonym Doktoro Esperanto. He called his new language Lingvo Internacia, but people preferred the name Esperanto.

After Ludwik's death in 1917, Esperanto became more popular. In some countries children had to study it at school. In the 1920s and 1930s many people shared Ludwik's dream of a peaceful world with a universal language. Unfortunately, the Second World War started. Ludwik's children died in the Holocaust and so did Ludwik's dream of a world without war. Esperanto, however, didn't die. Perhaps it is not the world language, but it survived.

*a world without war

DICTIONARY

Can you send postcards from Antarctica?

Writing to the World

- 1 We love to visit different countries for holidays and to learn about different cultures. In the past, people often sent picture postcards of the places on their holidays to friends back home. These were very popular and showed different parts of the world. In the 1880s the most popular picture postcard was the Eiffel Tower in Paris.
- 2 Now we have email and social media, and postcards are rare. But there is one young boy from the UK, Toby Little, who had the idea for a brilliant project. When he was five, he decided to write to someone in every country in the world! He wanted people to write to him, send him postcards and tell him about their cultures. He called his project Writing to the World. At first, he sent letters to his mum's friends. The first letter was to a woman in Hawaii. She lived in a town called Volcano. His first question was, 'Do you really live in a town called Volcano?' She sent him a reply.
- 3 Today Toby gets messages from people all over the world who want him to write to them. He completed his project. He wrote to every country and he's got replies from nearly all of them. Last year he got one from Antarctica. It told him about life for the scientists there. But Toby is continuing. Every week he writes about ten more letters! He usually asks, 'How are you?' 'What's your favourite place?' and 'Can you send me a recipe?' Toby's dream is to visit some of those countries. He wants to start with Gambia!

Traffic is a big problem in Newtown. There are too many cars. Not enough people ride bikes or walk to get to the city centre. Sue and Scott Stewart wanted to do something about it. So these two students from Newtown High School organised a commuter challenge. Our reporter Dev White talked to them.

- Dev:** What is a commuter challenge?
- Sue:** It's a race between commuters using different means of transport. We've got a pedestrian, a bike, a motorbike, a car and a bus. Each commuter has to go across town from the train station to the university.
- Scott:** We want to show the best way to get around town.
- Dev:** You mean the fastest form of transport?
- Scott:** Yes, but also the cheapest and most enjoyable.
- Sue:** The healthiest and the most ecological too.

A Go hiking through the beautiful mountains of the Mercantour National Park in the south of France – with a donkey! A family holiday to remember! Don't worry, we teach you how to make friends with your donkey!

B Intensive three-week Esperanto courses in beautiful Switzerland. Learn a new language and make friends with people your own age from across the world. There is also lots of time to go skiing or sailing on Lake Geneva! The price includes accommodation and all meals. Our next course for teens is starting on 19 June.

Are there ghosts in the Underground?

London Underground

People in towns and cities take public transport every day. In London four million people take the Underground! London Underground – Londoners call it ‘the Tube’ – is the oldest in the world. The first line opened in 1863. Now there are 11 lines, 270 stations and 400 kilometres of track.

The map

In 1931 Harry Beck designed the famous Tube map. Before that the map was complicated and difficult to understand. Beck put all the stations in straight lines with the same spaces between them. Undergrounds in other countries now use the same idea. It's easy to find your way.

The ghosts

People say there are lots of ghosts at stations on the Underground:

- 1 **Liverpool Street:** A man in white overalls sometimes waits for a train at night. A station worker first saw him in 2000 and the ghost was also on CCTV!
- 2 **Bethnal Green:** People often hear women and children screaming at this station. 126 people died there during the Second World War.
- 3 **King's Cross:** Here a well-dressed woman stands with her hands out and screams. Then she disappears!
- 4 **Covent Garden:** Workers often leave this station because they see the ghost. It's a tall man in a hat and coat with gloves. People say it's an actor. Someone killed him a long time ago.
- 5 **Aldgate:** 100 years ago an electrician nearly died. He fell onto the track. But he lived. His friends saw an old woman beside him. She touched his head. Then she disappeared!

GLOSSARY

ghost (n) the form of a dead person that some people think they can see
line (n) a track that trains travel on
overalls (n) a piece of clothing that covers your legs and body
scream (v) shout very loudly because you are angry, afraid or excited

Still life

Still life is a popular kind of painting for artists. Choose some objects – maybe some food or some flowers. Put them on a table and paint them! Easy? Oh no! Good still life painters are talented and hard-working.

Tjalf Sarnay is a famous still life painter today. He's fifty-four years old and he's Dutch, like a lot of famous still life painters from the past. But his paintings are different. In his pictures we can see ordinary objects like bread, burgers, cola cans, fried eggs, cheese and apples. His paintings are very clever. They are like photographs. Here are two pictures of a fried egg. Which is the photo and which is Tjalf's painting?

Tjalf has got four ideas:

- 1 Paint pictures like very good photographs.
- 2 Paint ordinary things.
- 3 Make those things beautiful.
- 4 Paint very big pictures.

Tjalf's paintings are called 'Megarealism'. They're very big and very real. One painting, of a burger with salt, pepper and ketchup is 823 x 550 cm! One look at Tjalf's paintings and you're very hungry!

1 Look at the still life paintings. Can you match the paintings with the dates?

- 1 eighteenth century
- 2 2014
- 3 fifteenth century

2 Read the article above about an artist. One of the paintings in Exercise 1 is by Tjalf Sarnay. Which one?

3 Read the text again. Answer the questions.

- 1 What nationality is Tjalf Sarnay?
- 2 Name three things in his paintings.
- 3 Why are his paintings clever?
- 4 What is his style of painting called?
- 5 How big is one of his paintings?

4 Who is your favourite painter?

5 In pairs, follow the instructions below.

- Student A, choose one of these still life paintings and describe it to your partner. Can your partner guess the painting?
- Student B, cover the pictures on this page. How many items from the paintings can you remember in two minutes?

6 PROJECT Use the internet to research a famous still life artist from your country. Make notes about:

- what is in his/her paintings.
- what is special about them.
- any other interesting information.

7 PROJECT Write a paragraph about the artist and add some pictures. Show your project to the class.

The thin old man with snow white hair
Sits by the window frame
He sits there quite a lot, you know
Again and again and again

He looks across the hills and fields
The big wide-open plain
He sees it every day, you know
Again and again and again

He watches fat white cows go past
Their heads all wet with rain
They go by every day, you know
Again and again and again

In his head he walks the paths
And cycles down the lane
It's just a dream he has, you know
Again and again and again

1 Can you remember a poem from school?

2 Read the poem above and choose the best title.

- a Country life
- b My favourite day
- c The window

3 Read the poem again. Answer the questions.

- 1 Where do you think the writer lives?
- 2 How do you think the old man feels? Why?

- 5 Find two examples of repetition in the poem – where the writer repeats a word or phrase.
- 6 Is the punctuation in the poem correct?

4 Do you like reading poetry? Why? / Why not?

5 In pairs, think of some words which rhyme (or nearly rhyme) with *again*. Then write another verse for the poem. Share it with the class.

Aerobic and anaerobic exercise

Everyone knows that exercise is good for us. But there are different kinds of exercise and they are good for different reasons.

Aerobic exercise

Aerobic exercise is when we use our arms and legs to do exercise. We move our whole body and use lots of different muscles. The word *aerobic* means 'with oxygen (O₂)'. We need lots of energy to do this

kind of exercise. Oxygen burns fat and carbohydrates to give us energy. Aerobic exercise isn't always fast or difficult. Walking and jogging (even climbing stairs!) are examples of easy aerobic exercise. Then there is harder exercise, like dancing or swimming and the hardest aerobic exercise is when we do skilled sports like volleyball or tennis. This exercise is good for our hearts and can also help us get thinner.

Anaerobic exercise

When we do anaerobic exercise, we don't jump around a lot. We only use some muscles because we want them to get stronger. We don't use a lot of oxygen and we only burn carbohydrates. A lot of gym exercises and exercises we can do at home are anaerobic. Weightlifting, sit-ups and push-ups are examples of this. Anaerobic exercise is good for some muscles and also for our bones and joints.

1 In pairs, ask and answer the questions.

- 1 What kind of exercise do you do?
- 2 Do you know the difference between aerobic and anaerobic exercise?

2 Read the article above and check your ideas from Exercise 1. Label the photos (A-E) A (aerobic) or AN (anaerobic).

3 Read the article again. Choose A (aerobic), AN (anaerobic) or B (both).

- Which type of exercise:
- | | |
|---------------------------------|------------|
| 1 doesn't need a lot of oxygen? | A / AN / B |
| 2 is good for our heart? | A / AN / B |
| 3 is usually inside? | A / AN / B |
| 4 burns fat? | A / AN / B |
| 5 burns carbohydrates? | A / AN / B |
| 6 is good for our bones? | A / AN / B |

4 What kind of exercise do you like - aerobic or anaerobic? Why?

5 In pairs, read the text on the right about a test and order the pictures (1-5).

How flexible are you?

Exercise is important for our flexibility and our balance. Here's a quick test. It shows how good your flexibility and balance are. Stand in the middle of the room. Cross your legs. Sit down but don't use your arms or knees. Then stand up. Again, don't use your hands, arms or knees. Can you do it? Don't try if you've got a bad leg or back!

6 **PROJECT** Use the internet to research a useful exercise or fitness test. Make notes about:

- what and how you do the test/exercise.
- why it is good for you.
- who can and can't do it.

7 **PROJECT** Write a paragraph about the exercise or test. Add some pictures. Show your project to the class.

What is a mummy?

The Ancient Egyptians buried dead people in an interesting way. They prepared the body with special oils and put it in a stone or wooden box called a sarcophagus. These bodies lasted a long time and we can look at them in museums today. The bodies are called mummies. They also put food and valuable things with the bodies. Sometimes they put the dead person's pet cat there!

Why did they do this?

The Ancient Egyptians believed in an afterlife. They thought that the spirit of the dead person went to another world. They needed their body and lots of their things to use in this afterlife. They needed food and drink for the journey there.

Where did they put the sarcophagus?

They put poor people in the sand, but they buried rich people in tombs. They painted the walls with pictures from their lives. Between 2628 and 1638BC, the pharaohs (the kings) went into special tombs. They were great stone pyramids. This was to protect them. They painted the sarcophagus with a picture of the pharaoh, often with expensive gold paint. Very important pharaohs had gold masks on their faces.

1 Do you know what an Egyptian mummy is?

2 Read the article above quickly and complete the labels for photos A-E.

3 Read the text again. Mark the sentences T (true) or F (false).

- 1 They buried animals with the people.
- 2 They thought that dead people had another life.
- 3 They buried all Egyptians in tombs.
- 4 They painted the bodies gold.

4 Read about the steps for 'mummification'. It took seventy days to prepare a body! In pairs, order the steps (1-6).

SCIENCE

Hot-air balloons

1 The hot-air balloon is not the fastest way to fly and it isn't the most direct. It depends on the wind. But the hot-air balloon was the first form of flying that carried people. It was a long time before aeroplanes. The first passengers were a sheep, a duck and a chicken! Then a few weeks later, on 21 November 1783 in France, a balloon carried two people.

2 The hot-air balloon uses science in a very easy but clever way. Hot air rises in colder air because it is lighter and less dense. Think about floating on water; our body floats because water is denser than we are.

3 The hot-air balloon has three main parts. There is a balloon envelope – this holds the air. The material is nylon and has sections called 'gores'. There is a valve at the top. Under the envelope there is a burner. This uses propane gas to heat the air in the balloon. There is a wicker basket to carry passengers. Wicker is strong and quite light.

4 When the pilot wants the balloon to go higher, he turns up the gas. This makes the air hotter and the balloon rises. To go down, he opens the valve at the top of the balloon. Some hot air leaves the balloon and it goes down. To go in the right direction, the pilot goes up or down to ride on the wind. Very clever!

1 Read the article above. Match pictures A-D with paragraphs 1-4.

2 Complete the labels in picture A.

3 Read the article again. Answer the questions.

- Who were the first passengers in a hot-air balloon?
- When did the first hot-air balloon carry people?
- Why do hot-air balloons rise?
- Why do hot-air balloons have wicker baskets?
- How do hot-air balloons go down?

4 Would you like to travel in a hot-air balloon? Why? / Why not?

5 Work in pairs. Take turns to tell each other about the hot-air balloon. Talk about:

- Student A: the first hot-air balloon.
- Student B: the science behind the balloon.
- Student A: the parts of the balloon.
- Student B: how it goes up and down.

6 **PROJECT** Use the internet to research a famous airship (an aircraft that used hot gas). Make notes about:

- its name and when it flew.
- how it moved.
- if it was safe.
- any other interesting information.

7 **PROJECT** Write a paragraph about the airship. Add some pictures. Show your project to the class.
